

**IN THE SPECIFICATION:**

Please REPLACE paragraph [0030] at page 8 with the following paragraph:

**[0030]** An undercoat layer may be made of a material selected from a thermosetting resin including ~~melamin~~melamine and epoxy, an insulating polymer including casein, poly(vinyl alcohol), poly(vinyl acetal), nylon, and cellulose, a conductive polymer including polythiophene, polypyrrole, polyphenylene vinylene, and polyaniline, and one of those polymers containing a metal oxide, for example, titanium oxide or zinc oxide, or other fine particles that perform functions of scattering exposed light and transporting photo-generated charges to the substrate.
